OPPOSED TO PROHIBITION.

No one questions the fact that Ly-man Abbott, the able editor of the Christian Union, is an anti-saloon man. No one has the right to question the honesty of his convictions. He is opposed to prohibition because he knows that prohibition is not a succes, and therefore means free and unrestricted which

We shall open our columns to a limited discussion of the question. We say limited, because without this qualification the letters which we should receive would be liable to occuy all the space of the Christian Union, leaving none for other topics. Our own convictions upon this question are clear, and, with the full consciousness that in expressing them we shall antegonic expressing the end to been to great.—Ez.

If it could have been foreseen that Tom Reed would have girded up his lions with a silk saish he never would have received a vote from a Western tongressman. The spectacle of a fat man with numberless yards of black silk around his abdomen is utterly repugnant to Western ideas of scenic effect.

We sold England last year \$475.060. this question are clear, and, with the full consciousness that in expressing their we shall antagonize the judgment and conscience of some of our readers, we have no hesitation in giving explicit expression to them. We advise the citizens of New York state to vote against constitutional prohibition, and to use their political influence in all legitimate ways for the defeat of the amendment.

In the Western ideas of scenic effect.

We sold England last year \$475,000, 000 worth of goods and bought from her only \$156,000,000 worth. There is a strong feeling in England now in favor of putting duties on our goods are retalliation for the McKinley bill. If that is done we should be manifest by the heavier loosers—and our farmers the heaviest losers of all.

to vete against constitutional prohibition, and to use their political influence in all legitimate ways for the defeat of the amendment.

In our judgment, constitutional prohibition in New York State is an attempt to accomplish by a short cut what can only be accomplished by a short cut what can only be accomplished by a short cut what can only be accomplished by a short cut what can only be accomplished by a short cut what can only be accomplished by a slow, educational process. The adoption of the constitutional amendment would have, in our judgment, no other effect than to give the state unifcense other. We doubt whether any well-informed process and our farmers in the case to the savest lake and family in the east came to Kansas a short time ago and soon afterward married two girls, the two ceremonies being test than a week apart. Fellows from the east soon catch on to the rapid mammer of doing things in the west, but sometimes they do not employ the proper amount of discretion in carrying out their plans.
